

## XM120W

The XM-120 polycrystalline panel is an excellent choice for dependable off-grid power generation.

The panel features hail-proof tempered glass and closely-packed polycrystalline cells, sealed into a robust aluminium frame. The compact junction box – unlike in many solar panels – doesn't protrude beyond the frame, so installation can be simple and neat.

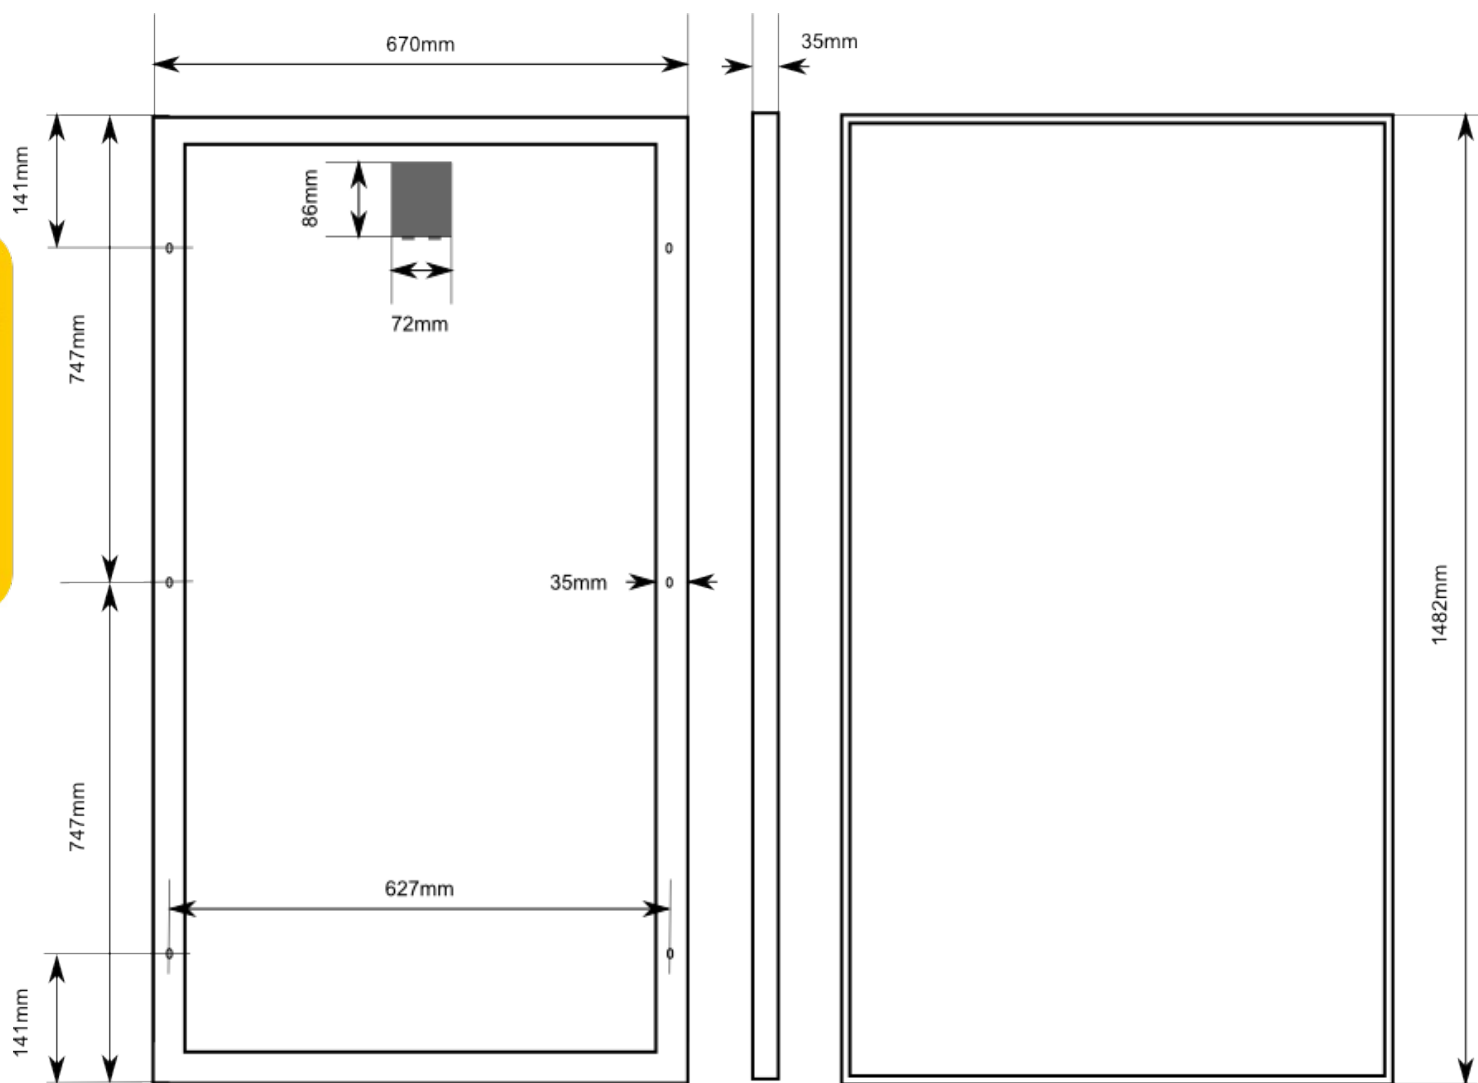

This panel is ideally suited to off-grid leisure applications such as narrowboats and motorhomes. It is also a very cost-effective choice for outbuildings away from the national grid, and for power systems to run automated monitoring equipment such as CCTV cameras.

Electrical Specifications		(at 1000 W/m <sup>2</sup> -STC)
P <sub>max</sub>	120 W	
V <sub>mp</sub>	17.5 V	
I <sub>mp</sub>	7.37 A	
V <sub>oc</sub>	21.5 V	
I <sub>sc</sub>	6.86 A	

Dimensions		
Length	1482 mm	
Width	670 mm	
Height	35 mm	
Weight	11.5 kg
