

Compress 5800i heat pump

Homeowner guide

Smaller, quieter, easier

Purpose-built for UK homes and UK weather, the all-new and compact 5800i air to water heat pump brings a more responsible and efficient way to keep you warm, wherever you live.

Why choose the 5800i air to water heat pump?

Quiet quality

Our quietest heat pump ever and Quiet Mark certified

Peace of mind

Remote monitoring via HomeCom Easy app for your reassurance

Stylish design

Sleek, small, outdoor unit looks good in your garden

Space-saving

All-in-one pre-plumb cylinder option saves space

Performance

Lower carbon emissions, higher flow temperature, improved home comfort

Smart design

Air to water design uses air to heat your home

Control your heating

There's a choice of digital thermostats to suit your needs, with the option to control your heating via the Bosch HomeCom Easy app.

If you choose to use the app, our team can monitor your heat pump remotely, at your request.

Take control and view our controls.

Configure your system

Your installer will help you configure the best set-up for your home from the two options.

Speed up your set-up

Short on time or space? Our all-in-one pre-plumb cylinder saves space and installation time, tucked away inside your airing cupboard. You'll be up and running in no time.
