

SolarEdge Product Waiver Approval

Issue date: August 16, 2023

Dear installer,

Upon examining your waiver request, SolarEdge decided to approve it under the following conditions:

1. This approval is limited to the United Kingdom only.
2. The approved designs are as follows:
 - a. Connecting the P801 Power Optimizer to PV modules of up to 430W in a 2:1 connection (total power of 860W).
 - b. P-series inter-compatibility according to the [technical note](#).
3. The rest of the installation guidelines, Inverter and Power Optimizer's performance remain as stated in the SolarEdge specifications and installation documents.

SolarEdge approves that the design mentioned above for this project, though exceeding the Power Optimizer maximum Rated Input DC Power (860W vs. 800W), will not void the Power Optimizer or Inverter warranty.

The site must be connected to the SolarEdge monitoring, and site IDs should be reported to waivers_support@solaredge.com within 3 weeks from installation.

Failing to report the site will void this waiver.
