	•		Connection Option				
Maximum rated	I	3.68	kW single phase, single, split or three phase system				
capacity, use se sheet if more th	eparate an one		kW three phase				
connection option	on.		kW two phases in three phase system				
			kW two phases split phase system				
SSEG manufacturer/supplier declaration. I certify on behalf of the company named above as a manufacturer/supplier of Small Scale Embedded Generators, that all products manufactured/supplied by the company with the above SSEG Type reference number will be manufactured and tested to ensure that they perform as stated in this Type Verification Test Report, prior to shipment to site and that no site modifications are required to ensure that the product meets all the requirements of G83/2.							
Signed Ganter Fronts-Str. 1, A-4810 Weis/Thaiheim Tel: +43/ (0) 72 42 / 241-0, Fax: 47 8 25			On be	ehalf of	Fronius International GmbH		
Note that testin	a can he a	done by the manufact	turer o	f an individual cor	nnonent by an external test house		

Note that testing can be done by the manufacturer of an individual component, by an external test house, or by the supplier of the complete system, or any combination of them as appropriate.

Where parts of the testing are carried out by persons or organisations other than the supplier then the supplier shall keep copies of all test records and results supplied to them to verify that the testing has been carried out by people with sufficient technical competency to carry out the tests.

Function	Setting		Trip test		"No trip tests	,,,
	Frequency	Time delay	Frequency	Time delay	Frequency /time	Confirm no trip
U/F stage 1	47.5Hz	20s	47.484Hz	20.053s	47.7Hz 25s	No trip occurred
U/F stage 2	47Hz	0.5s	47.030Hz	0.504s	47.2Hz 19.98s	No trip occurred
					46.8Hz 0.48s	No trip occurred
O/F stage 1	51.5Hz	90s	51.589Hz	90.023s	51.3Hz 95s	No trip occurred
O/F stage 2	52Hz	0.5s	52.011Hz	0.509s	51.8Hz 89.98s	No trip occurred
					52.2Hz 0.48s	No trip occurred

Function	Setting		Trip test		"No trip tes	sts"
	Voltage	Time delay	Voltage	Time delay	Voltage /time	Confirm no trip
U/V stage 1	200.1V	2.5s	199.77V	2.546s	204.1V 3.5s	No trip occurred
U/V stage 2	184V	0.5s	183.94V	0.535s	188V 2.48s	No trip occurred
					180V 0.48s	No trip occurred
O/V stage 1	262.2V	1.0s	262.44V	1.046s	258.2V 2.0s	No trip occurred
O/V stage 2	273.7V	0.5s	273.67V	0.548s	269.7V 0.98s	No trip occurred
					277.7V 0.48s	No trip occurred

Note for Voltage tests the Voltage required to trip is the setting ±3.45V. The time delay can be measured at a larger deviation than the minimum required to operate the protection. The No trip tests need to be carried out at the setting ±4V and for the relevant times as shown in the table above to ensure that the protection will not trip in error.

Self-Monitoring solid state switching The requirement is specified in section 5.3.1, No specified test requirements.	Yes/or NA
It has been verified that in the event of the solid state switching device failing to disconnect the SSEG, the voltage on the output side of the switching device is reduced to a value below 50 volts within 0.5 seconds.	NA (because electro- mechanical relays are used)

Additional comments
