1 Explanation of symbols and safety instructions

1.1 Explanation of symbols

Warnings

In warnings, signal words at the beginning of a warning are used to indicate the type and seriousness of the ensuing risk if measures for minimizing danger are not taken.

The following signal words are defined and can be used in this document:

DANGER indicates that severe or life-threatening personal injury will occur.

WARNING indicates that severe to life-threatening personal injury may occur.

CAUTION indicates that minor to medium personal injury may occur.

NOTICE

NOTICE indicates that material damage may occur.

Important information

The info symbol indicates important information where there is no risk to people or property.

1.2 General safety instructions

Notices for the target group

These installation instructions are intended for competent persons who are skilled in dealing with water installations, ventilation, heating and electrical systems. All instructions must be observed. Failure to comply with instructions may result in material damage and personal injury, including danger to life.

- ▶ Read these instructions before starting any installation.
- ▶ Observe the safety instructions and warnings.
- ▶ Follow national and regional regulations, technical regulations and guidelines.
- ▶ Document all work carried out.

Intended use

- ▶ Use the product only to control the heating and ventilation units.

All other use is considered unsuitable. We accept no liability for damage caused through incorrect use.

2 Product information

2.1 Product description

Connect-Key K 30 RF is an internet gateway and radio module for controlling and monitoring your heating system or ventilation unit remotely.

Please check the compatibility and the precise installation location of the Connect-Key in the instructions of the heat source or ventilation unit.

The app Bosch HomeCom Easy enables the remote control of the heating system or ventilation unit. The app is available for iOS or Android operating systems.

 **Download App:**
Bosch HomeCom Easy

ANDROID APP ON

Available on the

0010034894-002

Fig. 1

2.2 Possible applications

In conjunction with the heat source with control panel UI 800:

- K 30 RF establishes the connection between internet and the heat source as well as to the optional wired remote control (CR 20 RF).

In this system, wired remote controls are possible for up to 4 heating circuits.

For detailed information about radio remote control
→ operating and installation instructions CR 20 RF/ K 30 RF.

In systems with single-room control (SRC 100 RF):

- Connect-Key K 30 RF establishes the connection between the wireless single-room control and the heat source.

For more detailed information about single-room control
SRC 100 RF → System description for single-room control.

Fig. 2 Link to system description for single-room control

2.3 Scope of delivery

2.4 Technical data

Fig. 4 Dimensions in mm

	K 30 RF
Maximum power input P_{\max}	1.5 W
Radio frequency (RF)	868.3 MHz and 869.5 MHz [EU] ($P = \max. 10 \text{ dBm}$)
Wi-Fi	$f = 2400.0 - 2483.5 \text{ MHz}$ IEEE 802.11b ($P_{\max} = 19.7 \text{ dBm}$) IEEE 802.11g ($P_{\max} = 16.9 \text{ dBm}$) IEEE 802.11n ($P_{\max} = 19.1 \text{ dBm}$)
IP rating	IP30
Category of Recipient	SRD 2
max. SAR _{10g}	0.72 W/kg
Pollution degree (EN 60664)	2
Ball pressure test temperature T_{Press}	100 °C
 (DIN EN 60695-10-2)	
permissible ambient temperature T_{amb}	0 – 50 °C
Weight m 	55 g

Table 1

Necessary specification of the router

Characteristic	Specification
Network	WPA 2, WPA/WPA 2
Encryption	AES, TKIP+AES
DHCP	activated
SSID	not hidden
Wireless frequency	2.4 GHz

Table 2

2.5 Simplified UK/EU Declaration of conformity regarding radio equipment

Bosch Thermotechnik GmbH hereby declares, that the K 30 RF product described in these instructions complies with the Directive UK S.I. 2017/1206 (UK) 2014/53/EU.

You can request the complete text of the UK/EU Declaration of Conformity from the UK address indicated in this document.

3 Installation and commissioning

Overview of the commissioning steps

1. Mechanical design of the system (follow the instructions for all assemblies and components)
2. Initial charging with fluids and tightness test
3. Electrical wiring
4. if necessary, coding of the module (observe the instructions of the module and, where applicable the ventilation unit)
5. Switch on the system
6. Vent the system
7. Set the maximum flow temperature and DHW temperature on the heat source (observe the instructions of the heat source)
8. WLAN-Establish connection (→ Chapter 3.1)
9. Perform function tests, remedy warning and fault displays, if necessary
10. System handover

Note on installation of the wall mounting bracket

If the K 30 RF is mounted with the wall bracket, this wall mounting bracket must be mounted at least 10 cm away from metallic objects (door frames, reinforcing steel, etc.). This does not apply for the magnet adhesion directly to the sheet metal housing of the heat source.

Fig. 5

3.1 WLAN-Establish connection

The installation location of the K 30 RF depends on the heat source (→ installation instructions of the heat source). The installation site K 30 RF must have a sufficiently strong WLAN signal.

- ▶ Insert the K 30 RF in to the heat source and lock if necessary (→ installation instructions of the heat source). The LED on the K 30 RF initially lights up green, goes out for approx. one minute and then illuminates yellow for approx. 30 minutes.

Fig. 6

3.1.1 Connecting with WPS

While the LED lights up yellow:

- ▶ Press the WPS button on the router.

Fig. 7

- ▶ Press the button on K 30 RF for one second.

Fig. 8

The button flashes green and yellow alternately. The K 30 RF is in WPS mode and attempts to establish the WLAN connection to the router for 2 minutes.

Once the connection has been established, the  symbol appears in the display of the heat source and the button on the K 30 RF initially lights up green and then goes out after one minute. The K 30 RF is in power saving stand-by mode.

3.1.2 Connecting with the app Bosch HomeCom Easy

If the router does not support WPS, the WLAN network can be integrated manually using a smartphone app:

- ▶ Download the app Bosch HomeCom Easy from the internet (→ Fig. 1 on page 3).

In case the Bosch HomeCom Easy cannot be found in the respective app store, the software version from Android or iOS on the smartphone are outdated and are no longer supported.

- ▶ Install and start Bosch HomeCom Easy.
- ▶ In the app, start the hotspot mode and follow the instructions.

3.1.3 Problems with the WLAN connection?

If the connection can not be established:

- ▶ Read out the LED display and remedying the faults (→ Chapter 4).
- ▶ Establish a connection again.

3.2 Update the software

For safety reasons and troubleshooting, we recommend keeping the software up to date.

- ▶ Carry out a software update during installation.
- ▶ Recommend the end customer that during operation, software updates should also be carried out regularly.

Together with the end customer:

- ▶ register K 30 RF to the end customer via the app Bosch HomeCom Easy.
- ▶ Have the end customer agree to the conditions of use.
- ▶ If a software update is offered: have the end customer give their consent.
The LED flashing orange indicates that a software update is being carried out.

Whereas the LED flashes orange, no interaction is possible with the button. The K 30 RF restarts automatically after the update. The connection to all system components is interrupted temporarily, but it is automatically re-established. No interaction is required.

3.3 Reset the WLAN connection

As an alternative, the WLAN connection can be reset via UI 800.

To enable the WLAN connection to be reset, the LED on the K 30 RF must light up. If the LED does not light up:

- ▶ Briefly press key on K 30 RF.
The LED lights up.

To reset the WLAN connection:

- ▶ Press the button on the K 30 RF once for approx. 3 seconds until the LED briefly lights up red.
The LED flashes red 5 times. The existing WLAN connection is reset.

As soon as the LED lights up yellow on the K 30 RF, a new WLAN connection can be established (→ Chapter 3.1.1 or Chapter 3.1.2).

3.4 Reset the K 30 RF to the default settings

To be able to reset the K 30 RF, the LED on the K 30 RF must light up. If the LED does not light up:

- ▶ Briefly press key on K 30 RF.
The LED lights up.

To reset the K 30 RF to the default settings:

- ▶ Press the button on the K 30 RF for approx. 15 seconds until the LED lights up red briefly (for a second time).
Where applicable, after 3 seconds the LED lights up red briefly, flashes yellow 5 times after 10 seconds and then briefly lights up red (again) after 15 seconds.
The K 30 RF is reset to the default settings.

The LED on the K 30 RF initially lights up green, goes out for approx. one minute and then illuminates yellow for approx. 30 minutes.

4 LED displays on the K 30 RF and the resulting actions

The status of the K 30 RF is displayed by the LED at the free end. Colour (red/yellow/green) and duration of the lighting have the following meanings:

LED displays	Description
Constant red 	<p>Communication fault. Stored WLAN and/or connected wireless devices not found:</p> <ul style="list-style-type: none"> ▶ Check control panel of the device. <p>If no WLAN connection has been established:</p> <ul style="list-style-type: none"> ▶ Check the WLAN router. <p>To log in a new network:</p> <ul style="list-style-type: none"> ▶ Press the button on the K 30 RF once for approx. 3 seconds until the LED briefly lights up red. The LED flashes red 5 times and then lights up yellow. ▶ Establish connection (→ "constant yellow"). <p>If the connection to wireless devices has not been established:</p> <ul style="list-style-type: none"> ▶ Check whether wireless devices are energised and within range.
Flashing red 	<p>Hardware or installation error:</p> <ul style="list-style-type: none"> ▶ Check the installation.
Flashes red 5 times 	<p>Connection with the WLAN network is being deleted or has failed. K 30 RF reverts to the hotspot mode.</p>
Flashing orange 	<p>The firmware of the K 30 RF is being updated. The K 30 RF restarts automatically after the update. The connection to all system components is interrupted temporarily, but it is automatically re-established.</p> <ul style="list-style-type: none"> ▶ No interaction necessary.
Constant yellow 	<p>Hotspot mode active, ready to establish WLAN connection:</p> <ul style="list-style-type: none"> ▶ Open app and follow instructions. <p>-or-</p> <ul style="list-style-type: none"> ▶ Press the button on K 30 RF for one second to change to the WPS mode.

LED displays	Description
Alternating between constant green and yellow 	WPS mode active.
Flashing yellow 	<p>Connection with hotspot is established:</p> <ul style="list-style-type: none"> ▶ No interaction necessary.
Flashing green 	<p>Connection is established with WLAN but a connection cannot be established with the Bosch server:</p> <ul style="list-style-type: none"> ▶ Check Internet connection.
Constant green 	Connection is established with network.
LED off	<p>Power-saving mode or device switched off.</p> <ul style="list-style-type: none"> ▶ Briefly press the button on the K 30 RF when it is switched on to display the current device status via the LED.

Table 3

5 Environmental protection and disposal

Environmental protection is a fundamental corporate strategy of the Bosch Group.

The quality of our products, their economy and environmental safety are all of equal importance to us and all environmental protection legislation and regulations are strictly observed.

We use the best possible technology and materials for protecting the environment taking account of economic considerations.

Packaging

Where packaging is concerned, we participate in country-specific recycling processes that ensure optimum recycling. All of our packaging materials are environmentally compatible and can be recycled.

Used appliances

Used appliances contain valuable materials that can be recycled.

The various assemblies can be easily dismantled. Synthetic materials are marked accordingly. Assemblies can therefore be sorted by composition and passed on for recycling or disposal.

Old electrical and electronic appliances

This symbol means that the product must not be disposed of with other waste, and instead must be taken to the waste collection points for treatment, collection, recycling and disposal.

The symbol is valid in countries where waste electrical and electronic equipment regulations apply, e.g. "(UK) Waste Electrical and Electronic Equipment Regulations 2013 (as amended)". These regulations define the framework for the return and recycling of old electronic appliances that apply in each country.

As electronic devices may contain hazardous substances, it needs to be recycled responsibly in order to minimize any potential harm to the environment and human health.

Furthermore, recycling of electronic scrap helps preserve natural resources.

For additional information on the environmentally compatible disposal of old electrical and electronic appliances, please contact the relevant local authorities, your household waste disposal service or the retailer where you purchased the product.
